

CFO411: EOL Announcement

December 2009 – For immediate release.

Teleste announces the End of Life of the CFO411 series, effective on 31st of March 2010. The CFO411 series video link has been on the market place since 2000.

The last order date for products listed below is set to the 5th of March 2010.

Items affected

CFO411 series 4-channel video multiplexers (multimode)	
CMT411	4-channel video transmitter with stand-alone installation adapter
CRT411	4-channel video only transmitter, 5HP wide rack mount card
CRR411	4-channel video only receiver, 5HP wide rack mount card

Closing period and final orders

The last order date will be 5th of March, 2010. After this date no order confirmations are made for the above mentioned products. Production line for this series will be stopped on 31st of March. Spare part support and maintenance service are continued by Teleste after sales department according to their valid conditions to the date (availability and pricing).

Replacement (Updated January 2011)

For new installations the replacement is offered from the CFO410x and CFO810x series which have been available for the market since late 2010. These links do offer either 4-ch or 8-ch video only transmission based industry standard and pluggable SFP optical modules. Depending on the required link distance and selected fibre cable in use, a specific SFP model is mounted to the ordered unit. For multimode operation up to 2 km the series is known as CFO410S and CFO810S.

Due to nature of SFP operation the series is not backward compatible with late CFO411 series. SFP modules can be changed to another type on site if for example there is a change on the fibre cabling conditions.

The 4-ch CFO410 series shall follow the slim 5HP rack card mechanics suitable both for stand-alone and rack mount installations.

Please contact your nearest Teleste office for more information on product details, availability and pricing.
