

# CMA Series Module Adapter CMA011

## Model change

March 2012 – For immediate release.

Teleste announces changes on the CMA module adapter portfolio designed for CFO Fibre Optic units stand-alone / wall mount installations.

Following the earlier mechanical change resulting the current CMA025 and CMA035 models for 10HP and 15HP wide CFO cards respectively the model supporting 5HP wide units has been now renewed as well. The earlier aluminium profile material is now replaced by a sheet-metal structure.

### Items Affected

<b>CMA011</b>	Module adapter for 5HP size CFO card
---------------	--------------------------------------

### Closing Period and Later Support

Change will take place immediately. Only after sales services shall apply to CMA011 model.

### Replacement

<b>CMA015</b>	Module adapter for 5HP size CFO card
---------------	--------------------------------------

### Practical changes:

- Common 3-point fixing screw dimensioning to all models
- Alarm connector removed (D9-male)
- DC supply voltage input as a removable screw terminal
- CPS25x mains adapters compatible with all CMA015/025/035 models
- Compatible with CLP line protection units on top
