

# MPC & IPS Series Ethernet Switches

## EOL Announcement

March 2013 – For immediate release.

Teleste announces end of life for both series effective on 28th of June 2013. Discontinuation is due to a component availability and a reshaping of the product portfolio. The MPC series has been on the market place since July 2006 and the IPS series since January 2007.

### Items affected

MPC Series stand-alone Ethernet Switches, MPX product family	
<b>MPC-SFIX-F**F**-X-S1</b>	Managed 8-port stand-alone Fast Ethernet switch
<b>MPC-SGIX-G**G**-X-S1</b>	Managed 8-port stand-alone Gigabit Ethernet switch
IPS Series rack-mounted Ethernet Switches, EASI IP product family	
<b>IPS3XXX**A</b>	Managed 8-port 19" 1U rack-mounted Fast Ethernet switch (containing all models with optical port variations)

### Closing period and later support

During the closing period the product sales can be only offered in limited volume and shift towards to the new replacement is recommended. After closing the product support shall be continued by providing technical support and after sales services. The actual product maintenance service and spare part support shall be managed by the Teleste after sales in Finland.

### Replacement

New standalone and managed switch is model MES110. This 10-port switch offers 8 local ports with electrical interfaces compliant to 10/100Base-T operation whereas 2 uplink ports are available for SFP transceivers either for Fast Ethernet or Gigabit Ethernet operation.

Replacement for 19" 1U rack assembly is not currently available. Please check the availability and status later.

For more information please visit our web pages or alternatively contact the nearest Teleste office.
