Insider management

Teleste complies with the Market Abuse Regulation (EU) 596/2014 (MAR) and the insider guidelines of Nasdaq Helsinki Oy in their valid form at any given time. The company also has its own insider guidelines, which have been approved by the company's Board of Directors.

Teleste maintains project-specific and event-specific insider lists as necessary. Project-specific insider lists include the persons who work for Teleste under an employment contract or other agreement and receive insider information concerning an individual project, as well as any other persons to whom Teleste discloses insider information concerning an individual project. 'Project' refers to an identifiable arrangement or set of procedures which is being prepared at Teleste in strict confidence and which, when disclosed, could materially affect the value of Teleste's financial instrument. The CEO evaluates each case to determine whether a set of procedures or an arrangement is considered as a project.

Persons discharging managerial responsibilities at Teleste with the obligation to notify are the Board members, the CEO, the CFO, the SVP in charge of the Broadband Networks business unit and the SVP in charge of the Public Safety and Mobility business unit. They and persons closely associated with them shall notify Teleste and the Finnish Financial Supervisory Authority of any transactions they conduct in Teleste's financial instruments, which Teleste discloses in the form of separate stock exchange releases. It is recommended for persons discharging managerial responsibilities at Teleste to time their trading activities involving financial instruments issued by Teleste in such a manner that as accurate as possible information affecting the value of the share is available in the market.

The persons discharging managerial responsibilities at Teleste are not permitted, on their own account or on behalf of others, directly or indirectly, to trade in financial instruments issued by Teleste during the "closed window" period, that is, for thirty (30) days prior to the publication of an interim report

and financial statement release. Teleste has expanded the closed window to also apply to persons participating in the preparation of interim reports and/or financial statement releases and persons who, by virtue of their roles, have access to the content of reports before their publication. Such persons are subject to the same closed window of thirty (30) days.

Teleste's insider administration supervises compliance with the insider guidelines and maintains insider lists as well as a list of persons discharging managerial responsibilities and persons closely associated with them. Teleste's Senior Legal Counsel is in charge of insider issues.

Teleste has a whistleblowing channel that provides Teleste's employees and third parties with the opportunity to report concerns of potential misconduct in Teleste's business operations or other functions related to the company. The whistleblowing channel can also be used for reporting suspected violations of the rules and regulations concerning the financial markets.

Related party transactions, internal control, risk management and internal auditing

Related party transactions

Teleste assesses and monitors related party transactions in accordance with the Finnish Corporate Governance Code and Teleste's internal guidelines. Teleste strives to ensure that any conflicts of interest are taken into account in the decision-making process. The main rule is that all related party transactions always relate to Teleste's normal business, are in line with the company's purpose and are conducted on normal commercial terms. The Board of Directors decides on related party transactions that are not conducted in the ordinary course of business or are not implemented under arm's-length terms.

Teleste's legal department is responsible for the identification of related parties and maintains up-to-date records of related parties for the purpose of identifying related party transactions. Information on related party transactions is provided in the notes of the financial statements.

Internal control

Teleste's internal control is designed to support the implementation of the strategy and to ensure the achievement of the specified goals, compliance with the regulations as well as the reliability and accuracy of financial reporting. Internal control is based on Teleste's values and corporate culture, as well as Group- and operational-level structures and processes that support each other. The management of the Group and the business units are responsible for internal control as part of their normal managerial duties, while the Board evaluates and verifies the appropriateness and efficiency of internal control. In each of the two business units, the management of the business unit, supported by Teleste's centralised business controller function, is responsible for compliance with the principles of internal control on all levels of the units.

Risk management

Teleste's risk management policy defines the objective of risk management as the achievement of strategic objectives. The principles and objectives of the Group's risk management are subject to approval by Teleste's Board of Directors. Risk management aims to ensure the achievement of business goals, so that any material risks affecting business operations and posing a threat to the achievement of goals are identified and continuously monitored and evaluated. The company has risk management methods in place to prevent the materialisation of risks. In addition, insurance is used to cover financial risks and other risks that are reasonably insurable. Regular, cost-efficient evaluation

and management of risks are emphasised in Teleste's risk management policy. Risk management supports the business operations and generates added value that promotes decision-making and goal-setting by the management in charge of business operations. Monthly reporting constitutes part of the internal control and risk management system. In particular, it is used for the monitoring of the development of orders received, order backlog, deliveries, net sales, profitability, trade receivables, working capital and cash flow and, consequently, the development of Teleste Group's performance. The Board of Directors reviews essential business risks and their management quarterly and whenever necessary. Risk management constitutes an integral part of the strategic and operational activities of the business units and Group functions. Risks are reported to the Board on a regular basis.

Teleste's risk management system covers the following risk categories: strategic risks, operational risks, financial risks and hazard risks. For each identified risk, the Management Group confirms a risk owner who is responsible for risk assessment, selecting the risk management strategy, planning risk management actions and assigning responsibilities for them, and risk monitoring.

Internal auditing

Internal auditing includes evaluating the efficiency of processes related to risk management, supervision, management, administration and selected functions, as well as making proposals for their improvement. Internal auditing functions under the authority of the Board's Audit Committee. The CEO or a director appointed by the CEO is responsible for the implementation of the auditing, and the expertise of bodies external to the auditing unit is used where needed. In addition, internal auditing may carry out special tasks assigned by the Audit Committee. Internal auditing covers all the organisational levels. Internal auditing also coordinates priorities together with the external auditor.

Key features of the internal control and risk management systems related to the financial reporting process

The internal control and risk management of the financial reporting process are based on the general principles of internal control and risk management described above as well as the auditor's recommendations concerning best practices related to reporting processes and the control environment. The CFO is responsible for the systems of internal control and risk management related to the financial reporting process.

The internal control of the financial reporting process is established by describing the reporting process and specifying the control points on the basis of a risk assessment. The controls cover the entire reporting process from accounting by subsidiaries to monthly, quarterly and annual reporting. Controls are built into reporting systems, or controls may involve balancing, inspections carried out by the management, or specified procedures or policies. The CFO is responsible for ensuring that there is a designated person responsible for the implementation and efficiency of each control. The Group Accounting Manual specifies the standards for financial reporting. Financial reports to be published are reviewed by the Management Group, the Audit Committee and the Board of Directors prior to their publication.

The auditor elected by Teleste's Annual General Meeting audits the consolidated financial statements and parent company financial statements and reviews the stock exchange releases issued on interim reports and the financial statements. The Group's largest subsidiaries conduct a local audit.
